

Centaur, Kibow Biotech team up to market Renadyl in India for CKD

07 March 2018 | News

A globally patented product, Renadyl, is an effective kidney health therapy, targeted towards CKD patients, particularly those in Stage III/ IV (pre-dialysis). Renadyl is clinically proven to reduce nitrogenous waste and delay the need for dialysis. Renadyl also provides improved quality of life for Stage V patients on dialysis.

Centaur Pharmaceuticals and Kibow Biotech USA has announced a strategic long-term alliance to market **Renadyl** in India. Centaur will initially import and market the product in India, and will eventually manufacture and market with technical inputs from Kibow Biotech.

In an opening address, Mr. Gregory Tavevs thanked Centaur and Kibow for inviting him to the occasion & wished the strategic alliance a grand success.

Commenting on this strategic alliance, Dr. Natrajan Ranganathan, Ph.D. (Bio-organic Chemistry), inventor of the globally patented product, and the Founder and Managing Director of Kibow Biotech, said, "As my roots are from India, I am extremely happy that my company Kibow Biotech has collaborated with Centaur Pharmaceuticals. Now we can together offer the benefits of my 20 years of research to millions of Indian patients suffering from Chronic Kidney Disease (CKD) and make their lives better. Kibow also has an interesting research pipeline which we hope to bring to India for the benefit of Indian patients."

Speaking on this occasion, Mr. S. D. Sawant, Chairman and MD of Centaur Pharmaceuticals, said, "Kibow has a strong research infrastructure and expertise in modulating gut microbiome. Through this alliance, Centaur will leverage Kibow's research expertise and its own strong manufacturing and marketing skills to offer hope in the form of Renadyl to patients in India suffering from CKD. We are happy to announce this alliance in the backdrop of World Kidney Day and World Women's Day coming up on 8th March,
