

technology and manufacturing operations expertise," said Joe Haugh, Chief Executive Officer, Zenith Technologies. "It's an exciting time for us, with the life sciences industry embracing digital transformation to enable more flexible and efficient manufacturing facilities to bring new treatments to market faster. Our combined business will drive process excellence through tighter integration of manufacturing processes and systems, the efficient harnessing of information and analytics across the manufacturing value chain, and the adoption of IoT technologies delivering manufacturing 4.0. Together, we are well-positioned to help clients more efficiently produce the life-changing medicines and medical devices for patients who need them most."

The transaction is expected to close in the third quarter of 2019, subject to satisfaction of closing conditions, including regulatory review. Financial details were not disclosed.
