# Sai Life Sciences adopts ProcessMAP platform

07 August 2019 | News

**ProcessMAP's cloud-based analytics-driven EHSQ Platform to play a key role in supporting enterprise-wide initiatives to manage regulatory compliance and mitigate operational risks**

ProcessMAP Corporation, the industry leader in cloud-based data intelligence platform for Environmental Health and Safety and Quality (EHSQ) announced that Sai Life Sciences Ltd. has adopted ProcessMAP's platform enterprise-wide to support strategic initiatives in its Health, Safety, and Environmental sustainability (HSE) programs.

Hyderebad Sai Life Sciences is a leading pharmaceutical services company that delivers advanced discovery, contract development and manufacturing solutions to about 7 out of the top 10 innovator pharmaceutical companies, apart from several small and medium sized biotech companies.

ProcessMAP's EHSQ platform will support Sai Life Sciences achieve several key HSE objectives, including:

? Establish consistency across various HSE processes

? Improve reporting, investigation and corrective actions or preventive actions (CAPAs) management throughout incident life cycle

? Provide actionable insight to reduce injuries and illnesses

? Enable compliance management via task and action item management

? Facilitate collection and aggregation of sustainability metrics, and public reporting of corporate social responsibility (CSR) performance under the GRI G4 framework

? Help the organization accelerate initiatives to build safety as an operational culture

"We required a comprehensive EHSQ platform that complements our robust internal programs and help us move from manual processes to next generation digital capabilities," said **Ch. Sree Krishna**, VP & Head EHSS at Sai Life Sciences Ltd.
