

Indoco Remedies launches Favipiravir 400 mg in India

28 September 2020 | News

Fevindo 400 reduces pill burden by 50% and ensures convenient dosing and better patient compliance

Mumbai based Indoco Remedies has announced the launch of FEVINDO (Favipiravir) 400 mg Tablets in India.

Fevindo - 400 (Favipiravir) is an antiviral drug, effective against the RNA-based influenza virus.

The drug has been approved by DCGI in the treatment of Covid-19. Fevindo 400 reduces pill burden by 50% and ensures convenient dosing and better patient compliance.

Aditi Kare Panandikar, Managing Director - Indoco Remedies Ltd. commented, "The Covid-19 crisis has created vast disruption to life in India and all over the globe. As part of pharma industry, we have been able to do our bit in prevention of Covid-19 with our brands Karvol Plus, ATM, Febrex Plus and Rexidin SRS Mouthwash. With the launch of FEVINDO, we are taking the next step from prevention to the treatment of Covid-19."

Fevindo - 400 (Favipiravir) will be made available at all government approved COVID care centres and selected medical practitioners across the country.

In addition to Fevindo, Indoco has two more new products for launch in Covid Care range, i.e., Povidone Iodine Gargle and Immunity booster chewable tablets with Zinc, Vitamin C and Vitamin D.
