Governor of Telangana, Dr Tamilsai Soundarajan, inaugurates the Biplane Neuro Cath Lab

Yashoda Hospitals Secunderabad has launched a world-class state-of-the-art technology called 'Bi-Plane Neuro Angio Procedure Suite' with DTAS (Direct to Angio Suite) technology on the occasion of World Stroke Day. The Governor of Telangana, Dr Tamilsai Soundarajan, inaugurated the Biplane Neuro Cath Lab.

Dr Suresh Giragani, Senior Neuro & Interventional Radiologist, Yashoda Hospitals Hyderabad said, "Yashoda Hospitals is at the forefront of brain stroke treatment by launching 'Stroke Care on Wheels' special ambulances to provide treatment to brain stroke patients as quickly as possible. These special ambulances are aimed at reducing the time taken from home to the hospital. Yashoda Hospitals is the first in the state to offer the latest technology called 'Bi-Plane Neuro Angio Procedure Suite' which works with DTAS (Direct to Angio Suite) technology at Yashoda Hospitals which already have highly advanced medical procedures for brain stroke treatment. With this 'Bi-Plane Neuroangio Procedure Suite,' the scanning tests for brain stroke patients, their results, subsequent treatment decisions, and treatments (Thrombolysis and Thrombectomy) are all done in one room, on the same machine, so that the patient does not have to spend precious time during the golden hour. Thrombolysis and Thrombectomy treatment will be done swiftly. "

Dr Anand Balasubramaniam, Senior Neurosurgeon, Dr Komal Kumar, Senior Neurologist & others participated in the programme along with many Neurologists and Neurosurgeons.
