

Trivitron Healthcare sets up new ultrasound manufacturing facility in Mumbai

14 April 2022 | News

The ultrasound products manufactured in the new manufacturing facility will be sold under the brand name SonoRad

Trivitron Healthcare sets up its second ultrasound manufacturing facility in India at Patalganga Industrial Area, Mumbai.

The new facility of Trivitron Healthcare will be manufacturing a wide range of advanced ultrasound devices and accessories, using the state of art manufacturing facilities and advanced technology as per the current market requirements to enhance medical practice in India and across the globe.

The ultrasound products manufactured in the new manufacturing facility, will be sold under the brand name SonoRad, and are designed for large hospitals, healthcare institutions and individual radiology centres. With the integration of several technologies and advanced features, the series is backed with advanced quality.

"In the coming years, with focused business strategies, we will come up with many new indigenous product portfolios and make India the top destination for advanced healthcare and revolutionary medical technologies.' shares Chandra Ganjoo, Group Chief Executive Officer, Trivitron Healthcare.

"The new facility will be manufacturing basic to advanced ultrasound devices to meet the everlasting demands of every aspect of the medical needs. The new SonoRad ultrasound series will provide important diagnostic information to our user, including maternal-fetal medicine who are dealing with the potential of high-risk pregnancies, as well as for urology and cardiac imaging,' shares Sudip Bagchi, President, Trivitron Healthcare.
