

Movate signs MoU with Loyola College to set up AI & IoT-based robotics lab in India

12 March 2024 | News

To advance the boundaries of robotics and artificial intelligence

Telangana-based Movate, formerly known as CSS Corp, a digital technology and customer experience (CX) services provider, has recently signed a Memorandum of Understanding (MoU) with Loyola College in Chennai to set up an Advanced Robotics Lab.

This advanced facility will be equipped with cutting-edge artificial intelligence (AI) and IoT technologies, aiming to empower students with the latest tools and skills in the dynamic field of robotics.

The laboratory will encompass a total area of 750 square feet, with 600 square feet designated for real-time testing and an additional 150 square feet reserved for storage. The lab will house well-equipped robotic kits, a drone kit, 3D printers, projectors, and the necessary computing power to support students' endeavours. It will provide students with a platform to gain practical experience with advanced technologies. Additionally, Movate is also investing in specialised training for the faculty to ensure that the lab's resources are leveraged effectively to empower students and make them future-ready.

Movate has entered into a partnership with Yagen Robotics, a company that specialises in manufacturing educational robotics kits for various age groups and expertise levels. It also holds recognition from the Department of Industrial Policy & Promotion and the Ministry of Commerce & Industries, Government of India.
