Dubai Health inks agreement to establish UAE-India Friendship Hospital

Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum, Crown Prince of Dubai, Deputy Prime Minister, and Minister of Defence of the UAE; and Piyush Goyal, India's Minister of Commerce and Industry, witnessed the signing of eight Memorandums of Understanding (MoUs) aimed at deepening collaboration across key sectors including infrastructure, healthcare, higher education, maritime services, logistics, and private sector engagement.

The MoUs were inked during a special event organised by Dubai Chambers in Mumbai. The signing ceremony formed part of Sheikh Hamdan bin Mohammed's official visit to India.

In a series of agreements that underscore the vital role of business communities in advancing collaboration and mutual growth, Dubai Chambers signed three Memorandums of Understanding (MoUs) with the Confederation of Indian Industry (CII), the Federation of Indian Chambers of Commerce and Industry (FICCI), and the IMC Chamber of Commerce and Industry.

In another agreement that furthers a common commitment to delivering inclusive healthcare, Dubai Health signed an MoU to establish the UAE-India Friendship Hospital (UIFH), a new not-for-profit initiative aimed at providing inclusive and accessible healthcare, in Dubai.

Another agreement was formalised between the Dubai Medical University (DMU) and the All India Institute of Medical Sciences (AIIMS), the country's top-ranked medical institute. The cooperation agreement aims to strengthen academic and

research collaboration by promoting direct cooperation between faculty, administrative staff, departments, and research centres of both institutions.

Key areas of collaboration include student and staff exchange programmes, joint research in priority fields such as infectious diseases, metabolic disorders, and climate change, and the development of global health initiatives. The agreement also provides a framework for the exchange of academic materials and research publications. The agreement also covers cooperation with AIIMS in areas related to AI research, development, and digital transformation in medical education and healthcare.
