

Lords Mark India acquires 85% holding of Renalyx Health Systems

26 November 2025 | News

Enters into renal diagnosis space with this acquisition

In a strategic move to strengthen its presence in the medical diagnostics segment, recently listed Mumbai based Lords Mark India has acquired 85% holding in Bengaluru based Renalyx Health Systems. By March 2026, the acquisition will reach 92% holding. The company will continue to operate as an independent business unit of Lords Mark India.

The acquired company, Renalyx Health Systems is the developer of Renalyx, the world's first AI powered – Made in India sustained low efficiency dialysis machine (SLED). The product represents a significant step toward India's vision of becoming a global MedTech manufacturing hub. RxT 21, is an AI powered and IoT-enabled smart hemodialysis machine, offering remote monitoring, clinical connectivity, real-time data access, supports teleneurology platforms and enhances patient safety and quality of care.

Features of the ISO and CE certified machine includes integration with DNP database for seamless dialysis centre operations and cloud based patient EMR management, one touch operation for streamlined dialysis sessions, SLED mode for intensive care environments, personalised dialysis prescriptions, Kt/V monitoring for dialysis adequacy and clearance validation, single needle dialysis support, Endotoxin removal filter for patient safety, advanced sodium and ultrafiltration profiling.

The dialysis machine will be manufactured in collaboration with Bharat Electronics. Lords Mark recently received its manufacturing license on in September 2025.
