Suven secures patents for its Neurodegenerative Drug

Suven Life Sciences (Suven) has announced the grant of a product patent from Israel (198821), one product patent from Macau (J/001515) and one (1) product patent from USA (9018231) corresponding to their New Chemical Entities (NCEs) for the treatment of disorders associated with Neurodegenerative diseases.

The granted claims of the patents include the class of selective 5-HT compounds discovered by Suven and are being developed as therapeutic agents and are useful in the treatment of cognitive impairment associated with neurodegenerative disorders, like Alzheimer's disease, Attention deficient hyperactivity disorder (ADHD), Huntington's disease, Parkinson and Schizophrenia.

With these new patents, Suven has a total of five (5) granted patents from Israel, four (4) granted patents from Macau and twenty one (21) granted patents from the USA.

"We are very pleased by the grant of these patents to Suven for our pipeline of molecules in CNS arena that are being developed for cognitive disorders with high unmet medical need with huge market potential globally," said Mr Venkat Jasti, CEO of Suven.
