P.D. Hinduja Hospital's 14th Infectious Disease Certificate Course equips medical professionals with effective management of Infectious Diseases

P.D. Hinduja Hospital & MRC recently organised its 14th Infectious Disease Certificate Course (IDCC).

The certification helps budding and established medical professionals analyse the latest information and developments associated with the diagnosis and management of various infectious diseases. The course began with basic programs, growing into more advanced programs and sessions, all within a span of 6 days.

Along with a focus on Diagnosis, Management & Prevention of Infectious Diseases, the course also focused on infectious diseases like Tuberculosis, HIV, Pneumonia, Hepatitis A to E, etc. and panel discussions with interactive sessions led by experts on topics ranging from ICU Infections, Infection Control, Adult Immunization and more.

Dr. Rajeev Soman, Consultant Infectious Disease Physician, P. D. Hinduja Hospital said, "A multidisciplinary approach is needed to understand the requirements for infectious diseases control at a community level. P.D. Hinduja Hospital & MRC's IDCC is designed to train post-graduate students in the principles and practice of infectious diseases & microbiology, including anti-microbial resistance and update them on the latest developments in the area of infection control."

Dr. Camilla Rodrigues, Consultant Microbiologist & Chairperson Infection Control Committee, P. D. Hinduja Hospital said, "Infectious diseases (ID) remain one of the leading causes of morbidity and mortality in India and across the world. The objective of our annual IDCC course is to provide comprehensive knowledge on basic microbiology, disease transmission process, principles of epidemiology, current evidence-based infection control principles & practices and enhance skills of post-graduates in both medical and microbiology."

More than 130 medical professionals from all over the country attended the course with lecturers from top medical professionals in the country. Other topics discussed include: Antibiotic based principles; Newer Antibiotics; Interpreting Susceptibility Tests, fungal infections, an interactive session on Antimicrobial prescribing in renal failure and challenging cases in tropical infections, transplant and other infectious diseases were also discussed over the six days of this course. All participants received a certificate for successful completion of the course from P.D. Hinduja Hospital & MRC.
